# Premier Parts UK - The universal source for replacement parts for all these companies!

**W**elcome to the latest price list from **Premier Parts UK** which offers an extensive range of replacement parts for most makes of grass cutting machinery.

**Premier Parts UK** offers a One Stop Shop approach to ground care replacement spare parts. We supply Genuine and Replacement spare parts for most makes of grass cutting machinery.

Working from our Business Unit in Fife we stock parts to suit Toro, Ransomes, Jacobsen, Hayter, Kubota and John Deere to name a few. A comprehensive list of suppliers and manufacturers that we have links with can be seen on the inside front page of the cover of this price list. We can supply cutting cylinders and bottom blades for a wide range of manufacturers and where possible have the most unusual requests bespoke.

As we grow, our range of products and services will grow with us offering you, our customer, the One Stop Shop. We have extensive knowledge of the ground care industry and pride ourselves on being a fast and efficient service provider of replacement parts. We feel our ability to out source parts for most makes and models is second to none.

### **Key Features and Benefits of Dealing with Premier Parts UK**

## CYLINDERS

Crocodile Cylinder Blades are manufactured from tapered hot-rolled spiral steel sections in wear resistant Boron Steel, precision welded around a central shaft, and supplied with a lifetime guarantee against weld failure and breakage. The discs are completely welded (370 degree weld) to shaft. The spiral sections are welded to disc diagonally both at the front and back to fully secure blade. The complete spirals are fully heat treated and tempered to 45-50 Rockwell "C". The cylinders are painted with a polyester powder coated finish for increased corrosion protection and precision ground to a concentricity of less than 0.5mm, Crocodile cylinder blades are supremely balanced to reduce the effect of both noise and vibration. Crocodile cylinder blades are supplied SPUN and also RELIEF GROUND to further reduce torque, noise, vibration and minimise wear and tear on the motor.

## BOTTOM BLADES

Manufactured from hot-rolled, wear resistant Boron Steels, Crocodile bottom blades come with lifetime guarantee against breakage and a proven resistance in the most punishing 'top dressing' conditions. The undercut lip form is hot rolled into the steel section and is not formed or machined thus giving increased strength as the material structure is constant across the blade. Crocodile bottom blades are precision ground both on their flats and their edges and come fully hardened and tempered to 45-50 Rockwell "C".

## Benefits of Powerhead Clear-Cut:

It is the only unit on the market that fits a commercial trimmer. Eliminates grass from around irrigation heads in seconds.

Allows for unrestricted and proper water flow from irrigation heads that can become clogged and malfunction. Conserves water by allowing sprinkler heads to perform properly.

Provides easy visibility of yardage markers for golfers.

Saves time and money by reducing labour for ground maintenance.

## Features of Powerhead Clear-Cut:

Fits a straight shafted commercial trimmer.

Comes in a variety of head sizes that fit various trimmer models. It is a one-piece nylon unit with four vertical blades.

It's 24 vanes are designed to create a vacuum, pulling the grass into the blades and distributing it well away from the sprinkler head.

It may be used for golf courses, sports fields, residential communities, parks and recreational areas, schools, hospitals, cemeteries and other areas with extensive ground maintenance requirements.
